### DETAILED ACTION

Claims 12-14, 17-24, 27-31 are pending.

The restriction requirement with regard to the species restriction as set forth in the previous office action is maintained for reasons of record.

Claims 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 12, the term “ comprises “ is an open term and it does not limit the scope of the compound claim. In other word, the compound as claimed can embrace unlimited or indefinite compounds known or unknown in the art. In claim 13, the dependence on claim 14 is improper since it is not in ascending numeric order and claim 14 is not an independent claim. This would create printing problem upon patent issuing. The term “ A compound “ in claims 13 and 14 should be changed to “ The compound “. In claim 13, the term “ optionally “ should read as “ optically”.

Claims 12-14 are objected to because the formula I is drawn to a non-elected invention. The claims would be allowed if the formula I is excluded and the claims are redrafted properly.

Claims 17-24, 27-31 are objected to because the formulae IIb ( currently IIa misspelled), IIIa and III'a are drawn to non-elected inventions. The claims would be allowed if the said formulae are excluded and the claims are redrafted properly. In claims 18-24, the term “ A process” should read as “ The process “. In claims 27-31, the term “ The method “ should read as “ The process “.

Art Unit: 1625

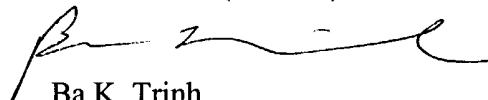

Applicants' remarks filed on November 28, 2003 have been considered but not found persuasive. The claims contain distinct species which do not have a common core structure as required for a Markush-type generic compound. Thus, the distinct species can not be rejoined, and the restriction of the distinct species is maintained. The amendment as filed has overcome the 112 second paragraph rejection of the previous office action.

No claim is allowed.
